## SKILLS

### Languages

JavaScript TypeScript PHP

### Frontend

React.js Next.js React Native HTML5  
CSS3 Tailwind CSS Material UI Chakra UI  
Bootstrap

### Backend

Node.js Express.js Laravel RESTful API  
JWT / RBAC

### Databases

MongoDB MySQL / SQL Supabase Firebase

### AI / Integrations

LLM Integrations Prompt Engineering  
AI Chatbots Razorpay Stripe Shiprocket  
OpenAI AWS

### Mobile & Tools

iOS Dev Android Studio XCode Expo  
GitHub Postman Figma VS Code

## EDUCATION

### Full Stack Web Development

Masai School, Bengaluru

Jan 2022 – Jan 2023

### B.Tech – Mechanical Engineering

GL Bajaj Institute of Technology, Greater Noida

Aug 2013 – Jun 2017

GPA: 75.92%

### Inspection & Quality Control

Indo Danish Tool Room, Jamshedpur

Jul 2018 – Jan 2019

### Intermediate – Science (CBSE)

Subhash Public School, Giridih

May 2011 – May 2012

GPA: 91%

## CERTIFICATIONS

- Google Cloud – AI Edition  
Google Cloud Technical Series
- Concept Explainer Marathon  
Masai School / Zoom

## PROFILE SUMMARY

Full Stack Developer with 3+ years of experience in MERN Stack & React Native development. Proficient in building scalable web and mobile applications. Experienced in AI-powered application development, LLM integrations, prompt engineering, AI automation workflows, and leveraging emerging technologies to enhance user experiences and business processes. Strong problem-solving, leadership, and collaboration skills with a focus on delivering high-quality software solutions.

## WORK EXPERIENCE

### MERN Full Stack Developer

Jun 2025 – Present

Technocrats Horizons Compusoft Pvt Ltd, Hyderabad

- Developed and maintained scalable web and mobile applications using MERN Stack (MongoDB, Express.js, React.js, Node.js) and React Native, delivering robust solutions for diverse business requirements.
- Designed and implemented RESTful APIs, database architectures, authentication systems, and backend services to support high-performance, secure, and scalable applications.
- Integrated third-party services including payment gateways, shipping providers, communication APIs, cloud services, and analytics platforms to enhance application functionality and user experience.
- Worked on AI-powered solutions, including LLM integrations, prompt engineering, AI-assisted workflows, content generation systems, and automation features to improve business efficiency.
- Collaborated with UI/UX designers, QA engineers, product managers, and stakeholders in Agile/Scrum environments to deliver high-quality features and releases within project timelines.
- Led and mentored junior developers, provided technical guidance, and contributed to knowledge-sharing initiatives across development teams.
- Built and maintained admin dashboards, analytics systems, reporting modules, and role-based access control solutions for enterprise and business applications.

### Full Stack MERN, iOS & Android Developer

May 2023 – May 2025

Explore & Do Technologies Pvt Ltd, Hyderabad

- Developed and maintained scalable web applications and cross-platform mobile applications for Android and iOS using React, React Native, Node.js, Express.js, PHP, and Laravel.
- Spearheaded delivery of 5 web projects, 5 Android applications, and 5 iOS applications, participating in full SDLC including requirement analysis, design, development, testing, and deployment.
- Built and integrated RESTful APIs, authentication systems, database solutions, and third-party services to enhance application functionality and performance.
- Optimized application performance, scalability, and responsiveness through efficient coding practices, debugging, and performance tuning.
- Conducted troubleshooting, bug fixing, and code reviews to maintain application stability, security, and maintainability.

### Customer Executive

Apr 2021 – Jan 2022

Dish TV (Freelance, Remote)

- Resolved customer queries in real-time, demonstrating strong communication and problem-solving skills.

## PROJECTS

### ThreeView AI – 3D Product Visualization & E-Commerce SaaS [↗ Live](#)

Jun 2025 – Present

React.js · TypeScript · Node.js · Express.js · Supabase · AWS · REST APIs · JWT · AI/LLM Integrations

- Developed a SaaS platform enabling businesses to create, customize, and publish interactive 3D product experiences for e-commerce stores.
- Built product onboarding workflows supporting manual creation, URL-based imports, and direct Shopify/WooCommerce store synchronization, reducing product setup time by 70%.
- Implemented multiple 3D model creation methods, including GLB uploads, AI-powered 2D-to-3D generation via Tripo AI, and external model library integrations, improving content creation efficiency by 60%.
- Developed asset management modules, subscription plans, user management, and payment gateways, reducing manual operational effort by 50%.

### Nippon Ply – Multi-Vendor E-Commerce Platform [↗ Live](#)

Jun 2025 – Present

React.js · TypeScript · Tailwind CSS · Node.js · Express.js · MongoDB · Razorpay · Shiprocket · JWT · RBAC

- Designed and developed a scalable multi-vendor e-commerce platform supporting vendor onboarding, product catalog management, secure checkout, and settlement workflows handling 10,000+ product records.
- Integrated Razorpay payment gateway with refund and reconciliation workflows, reducing payment processing issues by 30%.
- Implemented Shiprocket integration for automated shipment creation, order tracking, and courier allocation, improving fulfillment efficiency by 40%.
- Integrated Email, SMS, and WhatsApp notifications; implemented JWT authentication, RBAC, and CI/CD pipelines, improving API performance by 35%.

### Team Hub – AI-Powered Learning Management System [↗ Live](#)

Jun 2025 – Present

React.js · TypeScript · Node.js · Express.js · MongoDB · AWS · REST APIs · JWT · AI/LLM Integrations

- Developed an AI-powered LMS enabling course management, content delivery, assessments, certifications, and learner progress tracking.
- Integrated AI-driven capabilities including LLM integrations, prompt engineering, intelligent recommendations, chatbot assistance, and workflow automation, reducing manual content creation efforts by 50%.
- Implemented multimedia content management, analytics dashboards, reporting modules, and automated notifications, improving learner engagement by 35%.
- Optimized backend services and database operations to reduce API response times by 40% while ensuring security, scalability, and seamless user experience.
